8" SEWER**

ADVANTAGES & INCENTIVES

Borger's Advantages are Your Advantages:

- Tax abatements available through 380 Agreements.
- Central location between East and West Coasts.
- No personal state income tax.
- Proximity to other global companies means existing infrastructure and resources - like workforce training and adequate supply to utilities and natural resources.
- Workforce attraction - Borger has a long track record of attracting plant operators, engineers, CDL drivers, welders, mechanics, and many other high-demand professions.

As a Type A Texas economic development corporation, Borger Inc. is able to offer cash incentives directly to businesses.

Borger Inc. can pay cash incentives for creating jobs when you locate or expand your business in Borger. Call (806) 521-0027 to speak with Amy Fesser, Executive Director of Borger Inc. and learn more about available incentives.

INVESTMENTS BY THE NUMBERS:

\$6MM:

Incentives paid directly to businesses by Borger Inc. in the most recent 10 Years.

\$34MM:

Northwest Well Field project completed by City of Borger to expand available water supply for new and existing industry.

THRIVING INDUSTRY

Borger, Texas is home to operations for several major global corporations. Our strong industrial & manufacturing base gives you access to a network of suppliers and industrial service companies to support your operations and ensure access to quality talent.

Borger is not just home to major manufacturing, it's been chosen for expansions on multiple occasions:

Chevron-Phillips Chemical Company chose Borger for its Ryton® plant in 2007 out of 12+ sites. Greg Garland, senior vice president of planning and specialty products for Chevron-Phillips at the time stated, "This project solidifies Borger, Texas as the worldwide hub for Chevron-Phillips Chemical's PPS polymer business".

In 2014, when Agrium (now Nutrien) chose Borger for its urea plant expansion, the City of Borger, Borger EDC, and Hutchinson County invested alongside Agrium in new water infrastructure, tax abatements, and cash incentives to ensure the project would be adequately supported. Borger beat out 4 other sites to win this expansion.

Nutrien

WORKFORCE AVAILABILITY

U.S. Bureau of Labor Statistics surveys covering the radius of Borger, Dumas, Amarillo, and Pampa put available workforce at over 150,000. However, Borger has more than an available labor pool; instead we have an activated workforce—the American Community Survey 5-Year Estimates show that nearly 25% of Borger’s workforce are commuters, with almost 10% of workers driving in from another county to join Borger teams that not only do global business, but also have global reputations for quality. In short, we have built a better jobs environment and workers are happy to come.

Our location quotient for the goods producing super-sector (Manufacturing, Construction, Mining and Natural Resources) is 2.63 (BLS, Q2 2018).

WORKFORCE TRAINING

Borger’s supply of labor is only matched by the exceptional workforce training opportunities through our partners at Frank Phillips College. Through its relationship with Existing Industry, FPC has tailored a Career & Technical Education program that is second to none. From extensive safety training to certificate programs for welding and process technology, FPC is dedicated to serving the needs of industry and other local businesses so that a pipeline of talent is sustained for our employers

51.8% of our population age 25+ has completed some college.

23.7% have an Associate's degree or higher. (USCB, ACS 5-Year 2012-2017).

4.6% county-wide unemployment, the highest in the Texas Panhandle.

As of Q4 2018, 400 previously employed workers were actively seeking employment.
